

The American media is already controlled by too few owners and the information we get from the "mainstream" is mostly pap. Runaway capitalism should NOT be allowed further latitude in this important area for protecting free and DIVERSE speech. Profit should NOT be the main motive here. The free exchange of ideas and information in its most diverse way should be the motive if it is to "serve the public good" as is intended by our founding fathers. We are killing our supposedly democratic way of life by using profit as the main criteria. Stop this process of loosening or relaxing the rules and allowing a larger percentage of the market to be owned by fewer people. At a minimum, the vote should be postponed on June 2 and a demand should be made by congress for REAL debate on this issue (which really does not happen with anything of importance these days, by the way!!) Think about it. Our supposed representatives in congress can't keep bsing the American public forever. You are supposed to be working for the interest of all citizens, NOT the interest of big business. We do not have access to all the information we need right now and this change in the rules will make it even worse. Do something, please.
